How to add your debit card for Samsung Pay

1. Run your Samsung Pay app. To add your card, tap on the **plus icon (+) over Payment cards**. The app will activate the camera and ask you to aim it at the front side of your credit or debit card. Once the app detects the card number and expiry date, it will ask you to enter the security code CVC/CVV/CID (3-digit or 4-digit depending on the card type) and your name as it appears on the card.

2. Once you have added all the card details, tap on the "Next" option, and wait for the app to validate your card. Once that is done, agree to the terms and conditions of your bank if they show up.

3. You will then be asked to verify your card. You can choose from any of the verification methods shown on-screen (these may depend on your bank and/or card provider) and follow the instructions in the app to complete verification. When all this is done, you may also need to sign the card. Do that by drawing inside the box provided on the screen.

4. Your card is now added to Samsung Pay. You can add more cards to the app by tapping the "Add another card" option at the end of the process, or by tapping **Payment cards** on the Samsung Pay main screen and then "Add".
